2021 - Update #1

A group of motorcyclists is riding on a winding asphalt road through a mountainous landscape. The lead motorcycle is a black and gold dual-sport bike, leaning into a curve. Other riders in various gear are visible behind it. The background features rolling green hills under a clear blue sky. The text "Welcome to the world of Interphone" is overlaid in white, bold, sans-serif font across the middle of the image.

Welcome to the world of **Interphone**

INTERPHONE

#InterphoneStayInTouch

From its vast experience in the smartphone accessory sector, **Cellularline** has created **Interphone**: a special division focused on technological know-how, which makes a full range of Bluetooth® products. These innovative projects are designed to improve and redefine communication on motorbikes and to guarantee a safer yet more exciting experience.

The first Interphone product was made in **2005**, combining Cellularline's know-how in smartphone audio with technological innovations and the passion of the founder of this company located in the heart of Motor Valley. This unique synergy has created a device for communicating on motorbikes featuring an audio kit with a special microphone that can filter out background noise and guarantee clear communication while driving.

The **Interphone Business Unit** was founded in **2011**: a team entirely dedicated to developing and selling new products for communication on the go, now available in **over 60 countries around the world**.

Trusting Interphone means using a brand known all over the world, which studies the market to develop products that really meet the needs of the modern motorcyclist and which serves as the perfect partner that can offer its customers the best solutions for communicating on motorbikes thanks to:

- **A complete range of products and accessories**
- **A widespread sales network**
- **A logistics set-up that can quickly serve every store in the world**
- **A top-quality support service**

Intercoms

There is a lot riding on a connection

Interphone makes functional communication devices and accessories driven by motorcyclists' actual needs.

Communicating on a motorbike is really important. Interphone's research has led to more freedom in intercommunication and sound quality.

- **Single and paired devices compatible with every helmet**
- **Multi-user connections, from two up to 16**
- **Ever greater range**
- **Easy to use High-performance**
- **Batteries with fast charging**

Interphone devices have become must-have **innovative companions** for short or long trips, giving you the freedom of always being connected.

Easy-to-use, high-tech products for people who love motorbikes but sensibly invest in technology and safety.

Stay in touch

Audio accessory kits

Interphone is turning the concept of Stay in Touch into reality by designing accessories that can **improve and boost intercom functions**, which can be used on motorbikes, scooters, in your free time, when playing sport, on your own or with friends. This series of products enhances the performance of devices by expanding the ways and opportunities to communicate.

-  **Dedicated audio kits for specific helmet models**
-  **Universal audio kits**
-  **Kits with spare parts**

Audio kits so you can fully enjoy the Hi-Fi quality of the intercoms, microphones designed to block out external noise and have interference-free conversations, earphones for use without a helmet that can also make the intercom an excellent high-tech companion for outdoor sport and when you're on the go.

Cases and holders

Complete safety for your smartphone

For using your smartphone in complete safety, Interphone has designed and created a line of **holders** for

iPhone

Samsung

Universal holders for devices of all sizes

Cases and brackets fully meet your needs for functionality and protection.

Ease of use and technology are the basic essentials so every motorcyclist can find the right product for their device.

A mounting bracket for tubular handlebars is included in every pack, but it is well known that there are many ways to fasten your smartphone onto a motorbike or scooter. This is why the cases are compatible with all Cellularline optional brackets, so you can use your phone on any two-wheeled vehicle, such as the rear-view mirror bracket (SSP) which is perfect for scooters.
